#### INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

(Chapter I of the Patent Cooperation Treaty)

(PCT Rule 44bis)

Applicant's or agent's file reference C1-A0504P	FOR FURTHER ACTION	See item 4 below	
International application No. PCT/JP2006/306821	International filing date (day/month/year) 31 March 2006 (31.03.2006)	Priority date (day/month/year) 08 April 2005 (08.04.2005)	-
International Patent Classification (8th See relevant information in Form P	edition unless older edition indicated) CT/ISA/237		
Applicant CHUGAI SEIYAKU KABUSHIKI KA	AISHA		

1.	. This international preliminary report on patentability (Chapter I) is issued by the International Bureau on behalf of the International Searching Authority under Rule 44 bis.1(a).						
2.	This REPORT consists of a to	otal of 7 sheets, including this	cover sheet.				
	In the attached sheets, any ref to the international preliminar	erence to the written opinion y report on patentability (Cha	of the International Searching Authority should be read as a reference apter I) instead.				
3.	This report contains indication	is relating to the following ite	ems:				
	Box No. I	Basis of the report					
	Box No. II	Priority					
	Box No. III	Non-establishment of opinion with regard to novelty, inventive step and industrial applicability					
	Box No. IV	Lack of unity of invention	ол				
	Box No. V	Reasoned statement und applicability; citations a	ler Article 35(2) with regard to novelty, inventive step or industrial nd explanations supporting such statement				
	Box No. VI	Certain documents cited	ı				
	Box No. VII	Certain defects in the in-	ternational application				
	Box No. VIII	Certain observations on	the international application				
4.	The International Bureau will onot, except where the applicandate (Rule 44bis .2).	communicate this report to de t makes an express request ur	esignated Offices in accordance with Rules 44bis.3(c) and 93bis.1 but ader Article 23(2), before the expiration of 30 months from the priority				
			Date of issuance of this report 09 October 2007 (09.10.2007)

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

Box	x No. I Basis of this opinion	
1.	With regard to the language, this opinion has been established on the basis of:	
	the international application in the language in which it was filed	
	the translation of the international application into	. which is the language of a
	translation furnished for the purposes of international search (Rule 12.3(a) and 23.1(b)).	
2.	With regard to any nucleotide and/or amino acid sequence disclosed in the international application invection, this opinion has been established on the basis of:	n and necessary to the claimed
	a. type of material	
	a sequence listing	
	table(s) related to the sequence listing	
	b. formal of material	
	оп рарет	
	in electronic form	
	c. time of filing/furnishing	
··· ·	contained in the international application as filed	
	filed together with the international application in electronic form	
	furnished subsequently to this Authority for the purposes of search	
3.	In addition, in the case that more than one version or copy of a sequence listing and/or table(s) refurnished, the required statements that the information in the subsequent or additional copies is identified or does not go beyond the application as filed, as appropriate, were furnished.	elating thereto has been filed or cical to that in the application as

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability	
The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or applicable have not been examined in respect of:	to be industrially
the entire international application	
Claims Nos. 15, 18, 28	
because:	
the said international application, or the said claims Nos. 15, 18 relat subject matter which does not require an international search (specify):	te to the following
The subject matters of the above-mentioned claims relate to a method for tr therapy of the human body or a method for diagnosis.	reatment by
the description, claims or drawings (indicate particular elements below) or said claims Nos. 28  are so unclear that no meaningful opinion could be formed (specify):	
What is specifically encompassed in the "bispecific antibody" of the above- claims and what is not encompassed therein is not at all clear. So, the descriptions o mentioned claims are extremely unclear. Therefore, no meaningful comments can b for the above-mentioned claims.	f the above-
the claims, or said claims Nos are so inadeque by the description that no meaningful opinion could be formed (specify):	nately supported
no international search report has been established for said claims Nos. 15, 18, 28  a meaningful opinion could not be formed without the sequence listing: the applicant did not, within the prescribed to form the sequence listing are party to provide a sequence listing.	1
furnish a sequence listing on paper complying with the standard provided for in Annex C of the Administra and such listing was not available to the International Searching Authority in a form and manner acceptable to furnish a sequence listing in electronic form complying with the standard provided for in Annex C of the	it
Instructions, and such listing was not available to the International Searching Authority in a form and manner	acceptable to it.
pay the required late furnishing fee for the furnishing of a sequence listing in response to an invitation under or (b).	Rules 13ter.1(a)
a meaningful opinion could not be formed without the tables related to the sequence listings; the applicant did prescribed time limit, furnish such tables in electronic form complying with the technical requirements provided for of the Administrative Instructions, and such tables were not available to the International Searching Authority in a acceptable to it.	r in Annex C-bis
the tables related to the nucleotide and/or amino acid sequence listing, if in electronic form only, do not comply we requirements provided for in Annex C-bis of the Administrative Instructions.	with the technical
See Supplemental Box for further details.	

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

Во	к No. I	V Lack of unity of invention
1.	$\boxtimes$	In response to the invitation (Form PCT/ISA/206) to pay additional fees the applicant has, within the applicable time limit:
		paid additional fees
		paid additional fees under protest and, where applicable, the protest fee
		paid additional fees under protest but the applicable protest fee was not paid
		not paid additional fees
2.		This Authority found that the requirement of unity of invention is not complied with and chose not to invite the applicant to pay additional fees.
3.	This	Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is
		complied with
	$\boxtimes$	not complied with for the following reasons:
		Reference document:
		JP, 2001-523971, A (Genentech, Inc.), 27 November, 2001 (27.11.01), & WO, 98/50431, A2, & EP, 979281, A2, & US, 2003/207346, A1
		Since the above document describes a multi-specific antibody, wherein antibody L-chain parts contain a common sequence, it is not considered that there is a technical relationship including a same "special technical feature" just because antibody L-chain parts are the same.  Therefore, the subject matters of claims 1-14, 16, 17 and 19 and the subject matters of claims 20-27 are not considered to be a group of inventions so linked as to form a single general inventive concept, and so this application is considered to encompass two inventions.
		·
•		
		·
4.	Cons	equently, this opinion has been established in respect of the following parts of the international application:
		all parts
	M -	the parts relating to claims Nos. 1-14, 16, 17, 19

Document 6: JP, 2001-523971, A (Genentech, Inc.), 27 November, 2001 (27.11.01), & WO, 98/50431, A2, & EP, 979281, A2, & US, 2003/207346, A1

Document 7: Segal DM, et al., Introduction: bispecific antibodies, J. Immunol. Methods, 2001, vol. 248, nos. 1 and 2, pages 1-6

#### Claims 1-14, 16, 17 and 19

Document 1 describes a monoclonal antibody which can replace the function of blood clotting factor VIII (hereinafter, referred to simply as "factor VIII" by omitting "blood coagulation" as for each blood clotting factor), wherein the monoclonal antibody is for factors IX and IXa. Furthermore, document 1 describes that a conjugate of factors VIII and IXa activates factor X. Furthermore, document 1 suggests that the monoclonal antibody is rendered bispecific.

Document 2 describes a monoclonal antibody for factor X, wherein the monoclonal antibody does not inhibit the blood clotting activity of factor X (NMC-X/4). Furthermore, document 3 describes a monoclonal antibody for factor X as well.

Documents 4 and 5 describe that a conjugate of factors VIII and IXa activates factor X. Furthermore, as described in documents 6 and 7, preparation of a bispecific antibody is considered to have been well known to a person skilled in the art before the priority date of this application. Furthermore, document 6 describes a multi-specific antibody, wherein antibody L-chain parts are composed of a common sequence.

However, even in view of all these documents, it is not considered that a person skilled in the art could have conceived that a multi-specific antibody including a first domain recognizing factor IX and/or factor IXa and a second domain recognizing factor X can replace the function of blood clotting factor VIII. Namely, the subject matters of the above-mentioned claims are considered to exhibit a remarkable effect that could not have been conceived of by a person skilled in the art
